

Contents—Volume 17, 1988

Current Microbiology

© Springer-Verlag New York Inc. 1988

Number 1, 1988

Durg Vijai Singh and Har Darshan Kumar Effect of Methionine-Sulfoximine on Nitrate Uptake and Photosynthesis in the Cyanobacterium <i>Anabaena doliolum</i> Bharadwaja	1
T. Yamamoto, A. Ehmann, J.M. González, Jr., and B.C. Carlton Expression of Three Genes Coding for 135-Kilodalton Entomocidal Proteins in <i>Bacillus thuringiensis kurstaki</i>	5
Tala A.R. Al-Jalili and Haroun N. Shah Protoheme, a Dispensable Growth Factor for <i>Bacteroides fragilis</i> Grown by Batch and Continuous Culture in a Basal Medium	13
José E. Pérez-Ortín and Francisco Estruch A Rapid Method for the Screening of Plasmids in Transformed Yeast Strains	19
Steven M. Gendel Plasmid DNA of the Chromatically Adapting Cyanobacterium <i>Fremyella diplosiphon</i>	23
Michael A. Gaston, Pauline S. Duff, and Tyrone L. Pitt Lipopolysaccharide Heterogeneity in Strains of <i>Serratia marcescens</i> Agglutinated by O14 Antiserum	27
Claudia Sorlini, Tullio Brusa, Giancarlo Ranalli, and Annamaria Ferrari Quantitative Determination of Methanogenic Bacteria in the Feces of Different Mammals	33
Roland H. Felkner and Susan R. Barnum Plasmid Content and Homology of 16 Strains of Filamentous, Nonheterocystous Cyanobacteria	37
Juan C. Diaz Ricci and Francisco Tell Isolation of a <i>Candida utilis</i> Variant by Using a Nitrogen-limited Continuous Culture	43
Concepción Calvo, Ana García de la Paz, Victoria Bejar, Emilia Quesada, and Alberto Ramos-Cormenzana Isolation and Characterization of Phage F9-11 from a Lysogenic <i>Deleya halophila</i> Strain	49
Lynn O. Lewis and Allan A. Yousten Bacteriophage Attachment to the S-layer Proteins of the Mosquito-pathogenic Strains of <i>Bacillus sphaericus</i>	55

Number 2, 1988

Hugo L. David, Nalin Rastogi, Sabine Clavel-Sérès, and Françoise Clément Alterations in the Outer Wall Architecture Caused by the Inhibition of Mycoside C Biosynthesis in <i>Mycobacterium avium</i>	61
Mark J. Walker and John M. Pemberton Construction of Transposons Encoding Genes for β -glucosidase, Amylase and Polygalacturonate <i>trans</i> -Eliminase from <i>Klebsiella oxytoca</i> and Their Expression in a Range of a Gram-negative Bacteria	69
Bernard Poutrel, Pascal Rainard, and Yannick Lautrou Human and Bovine Group B Streptococci (Types II and III) Variations in the Virulence for Pregnant Mice	77
Deborah J. Roberts, Phillip M. Fedorak, and Steve E. Hrudey Culture Methods for Obtaining m-Cresol-degrading Methanogenic Consortia	83
Kenneth D. Tucker and John L. Neal Growth and Respiration of <i>Bradyrhizobium japonicum</i> USDA 143 with Nitrous Oxide as the Terminal Electron Acceptor ..	89
Kenneth D. Tucker and John L. Neal Amperometric Method for Monitoring Anaerobic Respiration with Nitrous Oxide as the Terminal Electron Acceptor	95
George T. Sperl and Gregory J. Harvey Microbial Adaptation to Bromobenzene in a Chemostat	99
S.H. Siddiqi, J.P. Libonati, M.E. Carter, N.M. Hooper, J.F. Baker, C.C. Hwangbo, and L.E. Warfel Enhancement of Mycobacterial Growth in Middlebrook 7H12 Medium by Polyoxyethylene Stearate	105
Frederick D. Quinn and Eugene D. Weinberg Killing of <i>Legionella pneumophila</i> by Human Serum and Iron-binding Agents	111
Giorgio Brandi, Giuditta F. Schiavano, Mauro Magnani, Amedeo Albano, Flaminio Cattabeni, and Orazio Cantoni Superoxide Anions Are Required for the Inactivation of <i>Escherichia coli</i> Induced by High Concentrations of Hydrogen Peroxide	117

Number 3, 1988

Charlotte M. McCarthy Reversal of Cerulenin Inhibition of <i>Mycobacterium avium</i> by Octanoate.....	121
M.W. Ferguson, K.L. Wycoff, and A.R. Ayers Use of Cluster Analysis with Monoclonal Antibodies for Taxonomic Differentiation of Phytopathogenic Fungi and for Screening and Clustering Antibodies.....	127
Wolfgang Schwabe, Andreas Weihe, Thomas Börner, Manfred Henning, and Johannes-Günther Kohl Plasmids in Toxic and Nontoxic Strains of the Cyanobacterium <i>Microcystis aeruginosa</i>	133
Charles R. Myers and Mary Lynne Perille Collins Penicillin-binding Proteins of <i>Rhodospirillum rubrum</i>	139
S.V. Seddon, H.N. Shah, J.M. Hardie, and J.P. Robinson Chemically Defined and Minimal Media for <i>Bacteroides gingivalis</i>	147
Gregor Reid, Roger L. Cook, Robert J. Harris, Joyce D. Rousseau, and Hugh Lawford Development of a Freeze Substitution Technique to Examine the Structure of <i>Lactobacillus casei</i> GR-1 Grown in Agar and under Batch and Chemostat Culture Conditions.....	151
Roger L. Cook, Robert J. Harris, and Gregor Reid Effect of Culture Media and Growth Phase on the Morphology of Lactobacilli and on Their Ability to Adhere to Epithelial Cells.....	159
Lynda J. Chalkley and Hendrik J. Koornhof Plasmids in Clinical Isolates of <i>Streptococcus pneumoniae</i>	167
Rosa Aznar, Carmen Amaro, and Elena Alcaide Characterization of R-Plasmids in Environmental Isolates of <i>Salmonella</i> : Host Range and Stability.....	173
Urvashi Patel, Mayur D. Baxi, and Vinod V. Modi Evidence for the Involvement of Iron Siderophore in the Transport of Molybdenum in Cowpea <i>Rhizobium</i>	179

Number 4, 1988

Elias K. Manavathu, Kalachar Suryanarayana, Seyed E. Hasnain, and Wai-Choi Leung Presence of DNA Sequence Homologous to <i>RAS</i> Gene in the Aquatic Fungus <i>Achlya ambisexualis</i> : Possible Role in Sporangiogenesis.....	183
G. Bradley and C.C. Gaylarde Iron Uptake by <i>Desulfovibrio vulgaris</i> Outer Membrane Components in Artificial Vesicles.....	189
David J. Kihm, Micki T. Hutton, John H. Hanlin, and Eric A. Johnson Zinc Stimulates Sporulation in <i>Clostridium botulinum</i> H3B.....	193
Hiroshi Fukushima, Kenji Maruyama, Ichiro Omori, Ko Ito, and Seiji Kaneko Isolation of Sucrose-Negative <i>Yersinia enterocolitica</i> Biotype 3 Serotype O3 Strains and Their Pathogenicity.....	199
Karen T.I. Duffy and David R. Waddell Genetic Characterization of Cannibalism in <i>Dictyostelium caveatum</i>	203
Jay B. Peterson and Thomas A. LaRue Whole-Cell Fluorescence for Observing Reductive Metabolism from Carbon Compounds and Hydrogen in <i>Azotobacter vinelandii</i>	209
Donat-P. Häder and Maria A. Häder Ultraviolet-B Inhibition of Motility in Green and Dark Bleached <i>Euglena gracilis</i>	215
M ^a Rita Ferrer, Jorgina Quevedo-Sarmiento, M ^a Angustias Rivadeneyra, Victoria Bejar, Rafael Delgado, and Alberto Ramos-Cormenzana Calcium Carbonate Precipitation by Two Groups of Moderately Halophilic Microorganisms at Different Temperatures and Salt Concentrations.....	221
Saheer E. Gharbia and Haroun N. Shah Glucose Utilization and Growth Response to Protein Hydrolysates by <i>Fusobacterium</i> Species.....	229
Raymond Hellio, Claude Fréhel, Jean-Yves Raugier, and Nalin Rastogi Electron Cytochemistry of Mycobacteria: Evidence That Strongly Acidic Sulfate Groups Are Present on the Surface of H37Rv (Virulent) Strain of <i>Mycobacterium tuberculosis</i>	235

Number 5, 1988

Charles E. Stager, James R. Davis, Mario N. Saccomani, Corpus O. Ortigoza, Reuben D. Wende, and James W. Raleigh Modified Inoculum for Radiometric Susceptibility Testing of <i>Mycobacterium tuberculosis</i>	243
Kalpit A. Vora, Cherry Singh, and Vinod V. Modi Degradation of 2-Fluorobenzoate by a <i>Pseudomonad</i>	249
Thomas L. Kieft and Sandra D. Spence Osmoregulation in <i>Thiobacillus ferrooxidans</i> : Stimulation of Iron Oxidation by Proline and Betaine Under Salt Stress	255
Trello Beffa, Roger Pezet, and Gilbert Turian Endogenous Elemental Sulfur Production from L-Cysteine in Dormant α -Spores of <i>Phomopsis viticola</i>	259
H. Kathleen Dannelly and Henry C. Reeves Purification and Characterization of Enolase from <i>Escherichia coli</i>	265
Shanmugasundaram Sozhamannan and Kuppanmuthu Dharmalingam Construction and Genetic Characterization of Lambda Specialized Transducing Particles Carrying the <i>rglB</i> Gene of <i>Escherichia coli</i> K-12	269
Matthew D. Collins, Reiner M. Kroppenstedt, Jim Tamaoka, Kazuo Komagata, and Takeshi Kinoshita Structures of the Tetrahydrogenated Menaquinones from <i>Actinomyces angiospora</i> , <i>Faenia rectivirgula</i> , and <i>Saccharothrix australiensis</i>	275
M. John Pickett Moraxellae: Identification	281
Anton S. Sonnenberg, Jos G. Wessels, and Leo J. van Griensven An Efficient Protoplasting/Regeneration System for <i>Agaricus bisporus</i> and <i>Agaricus bitorquis</i>	285
Nobuo Murata, Hitoshi Murata, Hiroshi Fujii, and Chihiro Sasakawa Behavior of R388rep(Ts):Tn5, a Thermosensitive Tn5 Vector, and Its Derivatives in <i>Erwinia carotovora</i> and Some Species of Rhizobiaceae	293
A.M. Junelles, R. Janati-Idrissi, H. Petitdemange, and R. Gay Iron Effect on Acetone-Butanol Fermentation	299

Number 6, 1988

Khyali R. Mittal, Robert Higgins, and Serge Larivière Some Serological Properties of <i>Actinobacillus pleuropneumoniae</i> Strains of Serotypes 1 Through 5	305
Adela G. de la Campa, Martí Aldea, Concha Hernández-Chico, Antonio Tormo, and Miguel Vicente Segregation of Elongation Potential in <i>Escherichia coli</i> Mediated by the <i>wee</i> Genetic System	315
Robert Greenberg, Daniel Lundell, Yair Alroy, Susan Bonitz, Russell Condon, James Fossetta, Beth Frommer, Keith Gewain, Mitchell Katz, Paul J. Leibowitz, Satwant K. Narula, Robert Kastelein, and Anita Van Kimmenade Expression of Biologically Active, Mature Human Granulocyte-Macrophage Colony Stimulating Factor with an <i>E. coli</i> Secretory Expression System	321
Elisa Garcia, Anja M. Hamers, Hans E.N. Bergmans, Bernard A.M. van der Zeijst, and Wim Gaastra Adhesion of Canine and Human Uropathogenic <i>Escherichia coli</i> and <i>Proteus mirabilis</i> Strains to Canine and Human Epithelial Cells	333
Lawrence C. Paoletti and Richard P. Blakemore Iron Reduction by <i>Aquaspirillum magnetotacticum</i>	339
Bernard R. Glick, Nick Menhart, Nei W. Soong, Wendy H. Farmer, T. Viswanatha, and J.J. Pasternak Isolation and Partial Characterization of Siderophore Mutants of <i>Azotobacter vinelandii</i>	343
Vaithilingam Sekar The Insecticidal Crystal Protein Gene Is Expressed in Vegetative Cells of <i>Bacillus thuringiensis</i> var. <i>tenebrionis</i>	347
Frederika Mandelbaum-Shavit and Itzhak Kahane Activity of Dihydrofolate Reduces in the Mollicutes <i>Acholeplasma laidlawii</i> and <i>Mycoplasma gallisepticum</i> and Their Susceptibility to Antifolates	351
